**Product Descriptions**

**Recommended Uses:**

Wilsonart HD® Sinks and Wilsonart Molded Acrylic Sinks are molded acrylic sinks and bowls commonly used as kitchen sinks and lavatory bowls. They may be bonded to Wilsonart HD Laminare and Wilsonart Solid Surface with appropriate Wilsonart Seam Adhesive to create a seamless flow from countertop to basin.

**Product Composition:**

The product is composed of a 100 % acrylic surface combined with a fiber reinforced polymer (FRP) backer. Wilsonart HD® Sinks and Wilsonart Molded Acrylic Sinks have a complete hygienic surface that contains no fillers. This surface provides superior resistance to stains, heat, impacts, bacteria, scratches, and thermal shock.

Wilsonart HD® Sinks and Wilsonart Molded Acrylic Sinks are not color matched to any solid surface sheets in the Wilsonart Solid Surface line. There will be a slight variation in color when Wilsonart HD® Sinks and Wilsonart Molded Acrylic Sinks are bonded to a solid color design in the Wilsonart Solid Surface line. This is considered normal and not a color issue.

Wilsonart HD® Sinks - Inside Dimensions						
HD® Sink Styles	Length		Width		Bowl Depth	
	Inches	Cm	Inches	Cm	Inches	Cm

Color Availability for Wilsonart HD <sup>®</sup> Sinks and Wilsonart Molded Acrylic Sinks	
True White	Ivory

## Standards and Certifications

Wilsonart HD<sup>®</sup> Sinks and Wilsonart Molded Acrylic Sinks conform to or exceed specifications for ANSI Z-124.6 and ANSI Z-124.3 respectively per independent laboratory testing.

## Care and Maintenance

Wilsonart HD<sup>®</sup> Sinks and Wilsonart Molded Acrylic Sinks are made of 100% acrylic surface combined with a fiber reinforced polymer (FRP). The surface is a non-porous, very hygienic, highly stain resistant, and is extremely durable. Its luxurious satin finish enables the sink to keep its beauty for years with minimum day to day care and maintenance.

Wilsonart HD<sup>®</sup> Sinks and Wilsonart Molded Acrylic Sinks surfaces may be cleaned with warm water and mild soaps, such as those used for hands and dishes. For more aggressive cleaning, a Scotch-Brite<sup>®</sup> pad and Comet<sup>®</sup>, Ajax<sup>®</sup>, Soft-Scrub<sup>®</sup> or any other powder detergent is recommended. Do not use cleansers that contain acids or alkalis; as they will damage the surface. Exercise extreme caution in using drain cleaners as they may damage the sink. Make sure the drain cleaning agent goes down the drain outlet and it does not sit in the basin.

### Simple Precautions

- Run warm water if pouring boiling water in sink
- Allow cookware to cool before placing in sink
- Do not expose the surface to harsh chemicals, such as paint remover, turpentine, nail polish remover (acetone) or stove and drain cleaners. If the chemicals come in contact with the surface, immediately wash them off with water, using appropriate safety measures to avoid injury.

As with all Wilsonart products, regular maintenance will keep your Wilsonart product looking great and performing at a high quality for many years.
